The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/783,717	<b>Applicant(s)</b> BAKER ET AL.	
	<b>Examiner</b> MELISSA RYCKMAN	<b>Art Unit</b> 3773	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Claims 41-43 and 86-94 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/23/08.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28 and 77 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson (U.S. Patent No. 4,696,300) and further in view of Barreiro (U.S. Patent No. 6,666,872).

Anderson teaches a fastener for use in a mammalian body, comprising:

- a first member (14a)
- a second member (14b)
- the first and second members having first and second ends (Fig. 1)
- a connecting member (12) fixed to each of the first and second members intermediate the first and second ends and extending between the first and second members (Fig. 1)
- the first and second members being separated by the connecting member

Art Unit: 3773

- one of the first and second members having a longitudinal axis and a through channel (Fig. 4b) along the axis arranged to be slidably received on a tissue piercing deployment wire (114a)
- a pusher (114b) that pushes the one of first and second members into the tissue while on the deployment wire

Anderson teaches the claimed invention but does not teach a plurality of longitudinally spaced vertical slots, however Barreiro teaches at least one of the first and second members includes a plurality of longitudinally spaced vertical slots (100) rendering the at least one of the first and second members flexible in a direction opposite the slots but stiff in a direction of the slots (this is a result of having the slots).

It would have been obvious to one of ordinary skill in the art to include the slots of Barreiro with the invention of Anderson, as this aids in fixation to the tissue as taught in Barreiro.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
